## THE SUSTAINABLE CHOICE

# The Sustainable Choice

*made & recycled in the UK*

For many years, UPVC windows and doors have been recognised as the durable, low maintenance and energy efficient option. Now, thanks to recent advances in recycling, UPVC windows and doors are the first choice material for sustainability too. It means that choosing to buy your UPVC windows and doors from us is good for your home, your pocket and the environment.

### 'A' rated for sustainability

Eurocell, which manufactures all of the UPVC components used in our windows and doors, is at the forefront of sustainable developments in the UPVC industry. The company recycles over 3 million waste window frames per year which would otherwise go to landfill. The material is used to manufacture brand new windows, for closed-loop material sustainability.

### Reuseable and recyclable for hundreds of years

Research has shown that 95% of 'post-consumer' or end-of-life UPVC windows can be recycled. According to the Building Research Establishment (BRE), the life cycle for a UPVC window or door is up to 35 years and they can be recycled up to 10 times. This means UPVC has a life of 350 years of re-use with minimal impact on the environment.

### Environmentally responsible component supplier

Our windows represent a genuine sustainable option. Not only because they help reduce CO<sub>2</sub> emissions, but also because UPVC is a fully recyclable material. Each year, tens of thousands of tonnes of UPVC are recycled, minimising impact on landfill waste sites.

STYLES TO SUIT  
YOUR HOME

## Styles to suit your home

*a welcome complement*

With a choice of contemporary colours and styles, you can create a look that is perfect for your home. Whether you want to match your existing décor, or make a stylish contrast, our Aspect panoramic doors offer the ultimate walkway from indoor to outdoor living.

*create a look  
that is perfect  
for your home*

## THE GREY REVOLUTION

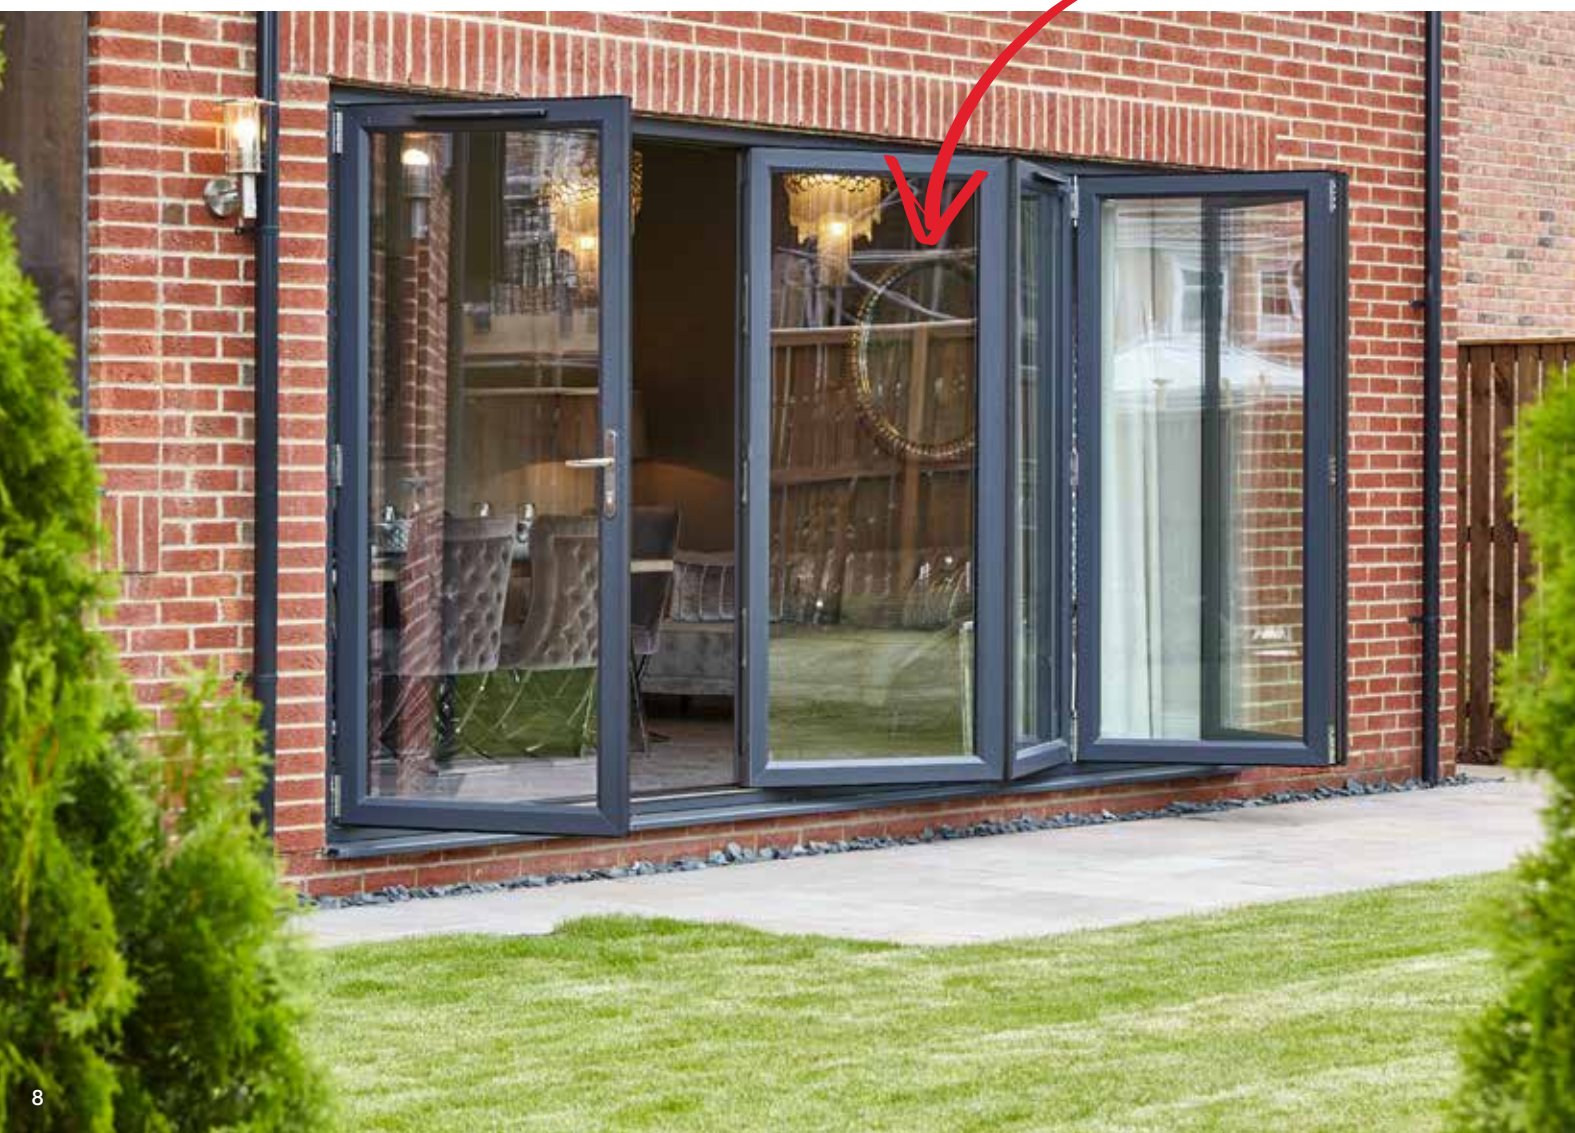

### The grey revolution

*get the all-grey  
aluminium look*

What's really special, though, is our grey substrate option. Unlike most coloured frames, which have a foil coating on top of white UPVC, our grey substrate frames are the same colour all the way through. So even with the doors open, there's no trace of white.

A great way to get the all-grey aluminium look that's getting more and more popular nowadays, without paying the premium price of aluminium itself.

*for the consistent  
look even with  
the doors open*

## BECAUSE SECURITY MATTERS

Image courtesy of Lissett Homes

*enhanced security features*

### BBA & Secured By Design

Aspect was the first bi-fold door on the market to gain British Board of Agrément (BBA) approval in addition to Secured by Design status.

### PAS24

We know that the security of your home is vitally important, that's why we have built our doors with enhanced security features, which has earned us the comprehensive PAS24 security certification.

We've also included stainless steel anti-jimmy pins in our door design. This means that the door can't be removed from the outside by intruders trying to get into your home. These pins are enclosed in the roller track for maximum security.

### Stunning aesthetics

Want to create a really stunning feature for your home? Aspect bi-fold doors up to 6m wide can help you do just that.

Secured by Design

## BI-FOLD DOORS

### Bi-fold doors

*add value to  
your home*

Stunning designs and the feeling of more space will enhance your lifestyle and improve the value of your home.

Imagine wide open spaces allowing air and light to flood into your home, instantly creating a contemporary look and feel. Our 'panoramic' bi-fold doors will add the wow factor to your home and can be fitted wherever you need easy access to your patio or garden.

No wonder more and more people are choosing our UPVC bi-fold doors to add that extra dimension to their homes.

The collection offers ultra slim frames for eye-catching looks, clever new design features and a wide range of colours to suit every home perfectly. In short, our new folding sliding doors are superior to any other similar UPVC products you'll find on the market today.

#### Easy access

A low-threshold option allows easy access between internal and external environments

## BI-FOLD DOORS

## ...cool in summer *bring the outside in*

Bi-fold doors create the perfect summer ambience, and with stunning openings of up to 6m wide, you really can bring the outside in. Depending on the door configuration you choose (see page 18 for more information), you can utilise various opening positions to allow refreshing ventilation into your home on those hot Summer days.

Imagine hosting a Summer garden party or barbeque – your bi-fold door will offer seamless access between your home and garden. Plus, it will make it easier when you want to take your furniture outdoors for alfresco dining!

## Warm in winter... *robust and built to last*

When the harsh British winter is in full swing, it's vital that you choose doors which can withstand what it throws at us. That's why our UPVC doors are manufactured with a square-edge profile which gives a superior seal along door edges, making them draught and weatherproof.

Tested to BS 6375 (Performance of Windows and Doors), our doors far exceed the minimum

requirements set out for the most extreme weather test. They also meet the British Standard minimum requirements for construction, security, safety, weather-tightness and strength of performance. This means behind their striking looks, your folding sliding door is robust and built to last – giving you many years of pleasure.

## BI-FOLD DOORS

### Intelligent design

*providing innovative solutions*

Our panoramic doors have been designed with slimmer, uncluttered sightlines to make them less obtrusive. This means that you see less of the doors and more of your patio, garden or the interior of your home.

We've made our new door range easy to install thanks to a slim-stepped outer frame which contains all the door hardware inside the frame. There's no need to cut plaster or make alterations in your home to make sure the doors fit. The benefit to you is minimal disruption and mess in your home when they're installed.

The unique D-shaped interior handle (shown above) allows the doors to fold back flatter. So when they're open they look much neater and won't distract from the beautiful view of your patio or garden. Plus, the D-handle has an intelligent anti-mishandling feature which stops your floor from being scraped by the shoot bolts, and it protects the bolts from being damaged and needing replacement – the main cause of repairs on folding sliding doors.

EVEN MORE STREAMLINED

SIMPLER TO FIT

EASY-USE, UNIQUE D-HANDLE

### Gaskets are hidden with a patented trim

We've incorporated a trim to hide the seals between the door leaves. This adds to the whole aesthetic look and feel of your new doors, as you won't see a line of black seal between the doors when they're closed!

### Traffic door restrictor

A traffic door restrictor allows controlled opening of traffic, entrance and French doors.

### Easier, smoother operation

Each bi-fold door has a built-in four-wheel aluminium roller track so that it glides open or closed smoothly and effortlessly.

# BI-FOLD DOORS

## Versatile space at its best

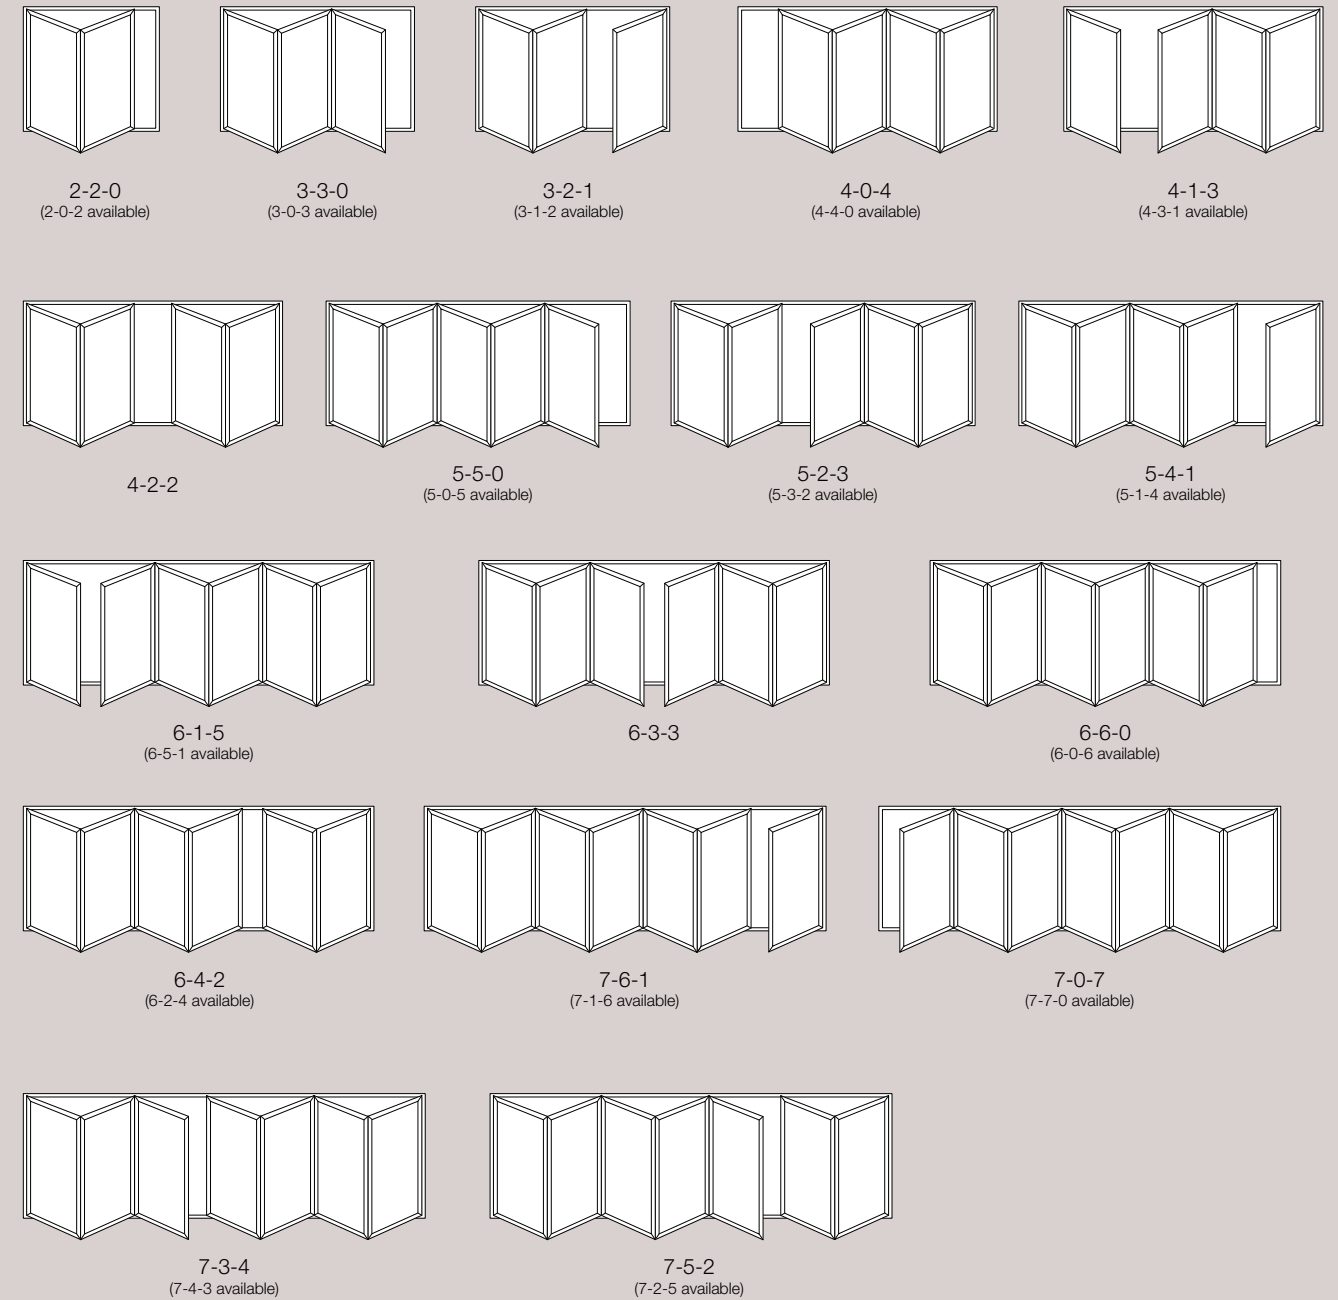

*with a range of configurations to suit you*

Bi-fold doors create a wider opened space than French or in-line patio doors, enabling you to make the most of your living area. Create a seamless transition between inside and outside when the doors are fully retracted.

Doors can be manufactured up to an impressive six metres wide, offering a simple yet stunning way to enhance your environment. And because every home is unique, we offer a choice of folding options, allowing you to choose how your door works. This maximum versatility helps you to enjoy and expand your home in the way that works best for you.

### Super wide openings

This impressive duo of Aspect bi-fold doors shown in Black Ash are a stunning addition to this property.

### Other options

All options are available as inward and outward opening doors. Extra leaves and additional configurations can be chosen, up to the maximum width of six metres. Please note - 2-2-0, 4-0-4, 4-2-2, 6-6-0 and 6-4-2 cannot be opened from the outside.

\*Maximum sash width per leaf is 1000mm

### How configurations work

Total number of leaves      Number of leaves folding left      Number of leaves folding right

## FLUSH FRENCH DOORS

## *the most popular choice*

The French door remains a popular choice, and the design hasn't changed a lot in the past 30 years. However, now there is another option - a flush sash panoramic French door.

A slim, stylish profile gives maximum views from the inside.

Meanwhile, the view from outside is enhanced by the use of elegant butt hinges rather than the conspicuous exterior flag hinges dictated by a

rebated door. This discreet, adjustable pencil hinge design preserves the smooth exterior lines of the frame and sash in keeping with today's design trends.

These French doors are also available with inward or outwards opening, to increase flexibility where space is limited.

TRADITIONAL HINGE

FLUSH FRENCH DOOR PREMIUM BUTT HINGE

## ENTRANCE DOORS

**Easy access**  
*for all*

Our Aspect entrance doors are designed to match our Aspect panoramic and French doors aesthetic perfectly, you can have a seamless solution throughout your home.

In addition to our standard threshold, we offer various options for those requiring a flusher-fitting low-threshold, to best suit your needs for all our panoramic doors.

For external doors, we offer three low-threshold options, including a Part M compliant double ramp threshold that allows easy pushchair and disabled access, as set out by the Building Regulations.

If you want a low-threshold for an internal bi-fold door, then we have a flush-fitting threshold that allows seamless integration of two rooms.
